

Save Time and Money with IMS EPCS

The **Effective, Secure, Streamlined** approach for sending electronic prescriptions for controlled substances to pharmacies without changing your workflow.

Say Goodbye to the days of
Handwritten Prescriptions...

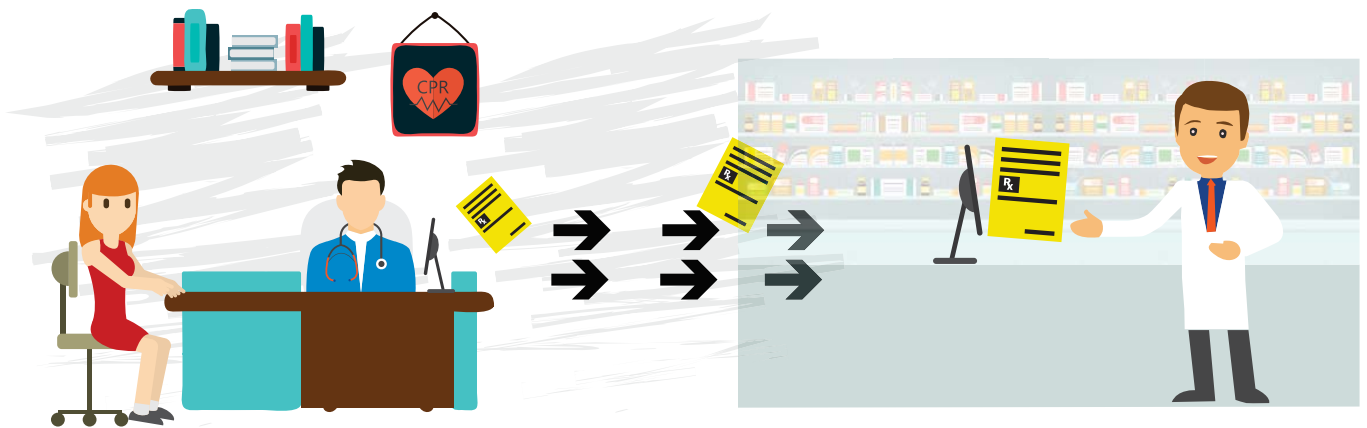

EPCS is fully integrated with the e-prescribing module so you can accelerate patient care without compromising quality.

Let Us Help You:

UNCOMPLICATED. TRUSTED. SECURED

DEA and Surescripts Compliant, Easy-to-Use Solution

Set your mind at ease and reduce the risk of unauthorized access and ensure accountability when prescribing controlled substances electronically with EPCS. It's highly secure and offers an easy-to-use solution to complete the identity proofing process, perform a two-factor authentication process, and use digital signature when submitting prescriptions.

- DEA approved and HIPAA compliant
- Surescripts certified for EPCS
- Online identity proofing and webcam identity proofing within IMS ClientConnect portal
- One-Time Password Token authentication mechanism authenticates e-prescribing controlled substances
- Integrated with e-prescribing workflow in IMS, including digital signature capabilities
- Shipping orders for OTP hardware tokens available through IMS ClientConnect
- Logs and reports available for possible audit
